

monocarboxylic acid biosynthetic process

response to endogenous stimulus

response to chemical

cell wall polysaccharide metabolic process

cell communication

response to organic substance

response to hormone

cell wall organization or biogenesis

xyloglucan metabolic process

polysaccharide metabolic process

hemicellulose metabolic process

cell wall macromolecule metabolic process

cell wall biogenesis

cellular carbohydrate metabolic process

oligosaccharide metabolic process

disaccharide metabolic process

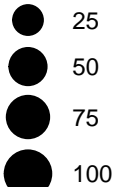

trehalose biosynthetic process

disaccharide biosynthetic process

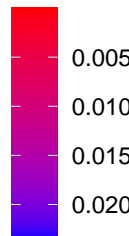

trehalose metabolic process

oligosaccharide biosynthetic process

size

p.adjust

response to gibberellin

cellular response to gibberellin stimulus

gibberellic acid mediated signaling pathway

gibberellin mediated signaling pathway

photosynthesis, light harvesting

photosynthesis

photosynthesis, light reaction

amino acid transport

ion transport

metal ion transport
